Ms. Susan Chaki, Unit Leader
Hazardous Waste Cleanups Program
Colorado Department of Public Health and Environment
4300 Cherry Creek Drive South
Denver, Colorado 80222-1530

Dear Mr. Rehder, Mr. Schieffelin, Ms. Chaki:

Enclosed is a copy of the Final Operable Unit 6, Walnut Creek Priority Drainage, RCRA Facilities Investigation/Remedial Investigation (RFI/RI) Report. Submittal of this report meets the former revised Interagency Agreement (IAG) Table 6 milestone.

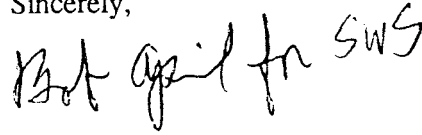

In the interest of reducing costs, plates 3.5-1, 3.5-2, 3.5-3, and 5.5-2 have not been included in this final version. Please remove those plates from your copy of the Draft report and insert them accordingly. Copies submitted to the Citizens Advisory Board, Technical Review Group, and cities are complete. In addition, Appendix F, the Ecological Risk Assessment is not included. The Ecological Risk Assessment for both Walnut Creek and Woman Creek will be provided in the Final OU-5 RFI/RI report, scheduled to be completed and submitted by April 2, 1996.

Submittal of this report currently represents the final action for OU-6. However, DOE would like to discuss closing out this operable unit this year using the Record of Decision process.
